Time					
06:00	09:00	12:00	15:00	18:00	21:00
Sunny intervals	Light rain	Heavy Rain	Fog	Sunny intervals	Partly cloudy (night)
Precipitation probability					
10%	40%	80%	60%	20%	10%

Forecast for Thursday 09 Jun 2022

Weather: Dry with clear spells during the early hours, but clouding over from the southwest fairly quickly, with outbreaks of rain and drizzle developing by mid-morning. The odd heavier burst of rain is possible towards midday, with lighter outbreaks of rain and drizzle persisting through the middle of the day and a fresh to strong southwesterly breeze. Becoming increasingly dry by late afternoon with low cloud gradually lifting and breaking to leave some clearer spells into the evening.

Chance of cloud-free hill tops above 800m: 80% or better at first deteriorating to 10% or less by midday. Improving to 70% or better by mid evening.

Low Cloud and visibility: Occasional patches of cloud above 700-800m at first, but extensive low cloud developing on slopes above 300-400m late morning onwards. Low cloud will lift and break early evening onwards leaving occasional patches above 600m. Visibility beneath cloud initially good, but becoming moderate or poor in rain and drizzle. Improving later as rain clears to become generally good beneath any cloud.

Freezing Level*	1700m	3100m	3100m	2400m	2100m	1900m	1800m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

It will feel cold on the summits at first and again later in the day, so remember to pack warm layers as well as waterproofs. Extensive low cloud and some strong winds will bring difficult navigation conditions to many higher routes for much of the day.

Forecast for Friday 10 Jun 2022

Weather: Clear spells and the odd light shower in the west during the early hours of Friday. During the day a mix of sunny spells and a low chance of an isolated light shower. Increasingly windy during daylight hours with strong and gusty winds affecting higher routes and summits.

Maximum wind: Southwest 30-35mph gust 45mph.

Chance of cloud-free hill tops above 800m: 80% but 40% in the west during the early hours.

Low Cloud and visibility: Occasional periods of cloud on slopes above 400-500m in the west during the early hours, otherwise only patchy cloud near 800-900m, mainly in association with any showers.

Temperature: **Valleys:** Plus 9 Celsius becoming plus 16 Celsius.
At 800m: Plus 8 Celsius.
Freezing level: Above the summits.
